Users should be unable to log in until they have successfully completed the registration process, which includes providing a valid email, a unique username, and a password.	1.Go to homepage. Make sure user is not signed in. 2.Navigate to Register page. 5. Reduce size of screen and repeat steps 1-4.	Attempt to login using unregistered username and password. Verify that this fails.	PASS	F29, F30
T04	US02: As a returning user I can log in using my existing credentials or log out so that I can access my personal information in a secure way.	The user icon displayed at the top of the page should visually distinguish whether the user is currently logged in or logged out, with the icon being filled when the user is logged in and also their name being shown underneath the icon.	1.Go to homepage. Make sure user is not signed in. 2.Navigate to Sign in page. 3.Sign in. 4.Navigate to Sign out page. 4.Log out	Login and verify user icon shows as "filled in" and username is shown under the user icon. Logout and verify user icon is outlined with the 'Account' written underneath. Verify that pop up messages confirm the activities each times.	PASS	F01, F29
T05	US02: As a returning user I can log in using my existing credentials or log out so that I can access my personal information in a secure way.	Users should have the ability to log in by simply clicking on the user icon located at the top of the screen and choosing the "Login" option from the menu, where they can enter either their username or email and the corresponding password.	1.Go to homepage. Make sure user is not signed in. 2.Navigate to Sign in page. 3.Sign in.	Verify that when no user is logged in, clicking on user icon, the login and register options appear on drop-down. Clicking on login option can go ahead and log in.	PASS	F01, F29

T06	US02: As a returning user I can log in using my existing credentials or log out so that I can access my personal information in a secure way.	Users should have the option to log out by selecting the user icon at the top of the screen and choosing the "Log Out" option from the menu.	<ol style="list-style-type: none"> 1.Go to homepage. Make sure user is signed in. 2.Navigate to Sign out page. 3.Log out 	<p>Verify that when the user is signed in, clicking on user icon, the logout option appear on drop-down. Verify when clicking on the Logout link, a confirmation prompt displays: "Are you sure you want to sign out?" , then the user can decide whether to proceed.</p> <p>Verify after successfully logging out, the user should be redirected to the homepage.</p>	PASS	F29
T07	US03: As a new user I can receive an email confirmation after registering so that I can verify that my account registration was successful.	When a new user registers, the system should automatically send an email confirmation to their registered email address.	<ol style="list-style-type: none"> 1.Go to homepage. Make sure user is not signed in. 2.Navigate to Register page. 3.Register 4.Open your emails 	<p>Verify that after registration form is submitted, an email is sent out to the user's registered email address.</p>	PASS	F29
T08	US03: As a new user I can receive an email confirmation after registering so that I can verify that my account registration was successful.	The confirmation email sent to new users should include a clickable link that, when accessed, confirms and activates their newly created account.	<ol style="list-style-type: none"> 1.Open your email, and the relevant email 2.Click on the link provided 3.Press confirm 4.Sign in 	<p>Verify that the email contains an clickable link and when clicked on, it redirects the user to the verification page, and it can be successfully used to confirm their email address.</p> <p>Verify that after confirmation the user can sign in successfully.</p>	PASS	F29

T09	US04: As a site user I can access my personalized user profile so that I can view my order history and payment information and keep track of purchases.	Users should have the capability to save, then view and manage their default delivery information on the profile page, making it convenient for future orders.	1.Go to homepage. Make sure user is signed in. 2.Navigate to My Profile page (through the user icon)	Verify that the My Profile link is available on the menu when the user is logged in on each page. Verify that the page contains a profile form that can be saved or updated after filling the fields out.	PASS	F30
T10	US04: As a site user I can access my personalized user profile so that I can view my order history and payment information and keep track of purchases.	Users should be able to view a history of their previous orders on the profile page, providing them with an overview of their past transactions.	1.Go to homepage. Make sure user is signed in. 2.Navigate to My Profile page (through the user icon)	Verify that on the right hand-side of the My Profile page, features an Order History box, where users can effectively track their purchases.	PASS	F30
T11	US04: As a site user I can access my personalized user profile so that I can view my order history and payment information and keep track of purchases.	Only the logged-in user associated with the profile should be able to access and view their own profile page. Other logged-in or not logged-in users should not have access to someone else's profile page.	1.Go to homepage. Make sure user is signed in. 2.Navigate to Logout. 3.Click "Sign Out" when the system double check. 4.Append '/profile' on the webpage's url.	Verify when the user is not logged in and tries to access the My Profile page through its url, they receive the Server Error (500) code. Verify when a different user logs in and navigate to the My Profile page, they will be able to view their own details only.	PASS	F29, F30

T12	US05: As a site user I can quickly identify what the website is selling and easily navigate the pages so that I can quickly find the information and functionality I am looking for.	The homepage should effectively convey and suggest the core purpose of the website to visitors.	1.Go to homepage.	Verify when the user lands on the homepage, they will see the company logo, a very relevant background image with suggesting and call to action overlay texts and buttons Verify, there a large, golden button on the page, inviting the visitor to browse in the shop and .. eventually the purpose of the website is to make them purchase the products.	PASS	F01, F02, F03, F04, F05
T13	US05: As a site user I can quickly identify what the website is selling and easily navigate the pages so that I can quickly find the information and functionality I am looking for.	There must be a dedicated page that effectively communicates the business's story, providing insights into its mission and values. The presentation of this information should be well-organized and engaging to website visitors.	1.Go to homepage. 2.Navigate to the About Us page	Verify the About Us page explains the company background effectively, thus connecting with the users. The image displayed is also enhancing the dedication of the organisation.	PASS	F02, F16
T14	US05: As a site user I can quickly identify what the website is selling and easily navigate the pages so that I can quickly find the information and functionality I am looking for.	The website must include a navigation menu positioned, looking the same at the top of each page and clearly labelled.	1.Go to any page.	Verify that that the navigation bar is responsive and consistent across all pages of the site.	PASS	F01

T15	US05: As a site user I can quickly identify what the website is selling and easily navigate the pages so that I can quickly find the information and functionality I am looking for.	The navigation bar must display the correct items regardless of whether a user is logged in or not	1.Go to homepage. Make sure user is not signed in. 2.Log in. 3.Log out. 4.Log in as admin user.	Verify that the nav bar features the correct items for each user based on their role when logged in.	PASS	F01
T16	US06: As admin I can add new products to the website so that I can keep my shop up to date.	Admin users should have the capability to add a new product to the website, and once added, the new product should be included in the list of products viewable on the site.	1.Go to homepage. Make sure admin user is signed in. 2.Navigate to the product management link (through the user icon dropdown). 3.Click on it. 4.Go to Admin on the navigation bar	Verify when clicking on the Product Management link, it directs the user to the Product Management page, where they can add products to the online shop, using the form provided. Verify the admin user can also add a new product through the Django admin window by clicking on 'Products' on the left hand-side menu, then clicking '+ Add Product' in the top right corner. Verify after submitting the new product either way, it is instantly visible on the products list.	PASS	F32, F33
T17	US06: As admin I can add new products to the website so that I can keep my shop up to date.	Non-admin users should not have the ability to add new products to the website. This	1.Go to homepage. Make sure user is signed in who is not admin. 2.Append '/products/add' on the webpage's url.	Verify when a general user is logged in and tries to access the Product Management page through its url, they receive an error message, saying: "Sorry, only store owners can do that"	PASS	F01, F29, F33

		functionality should be restricted to admin users only.	3.Navigate to Logout. 4.Click "Sign Out" when the system double check. 5.Append '/products/add' on the webpage's url.	Verify when an anonymous user tries to access the Product Management page through its url, they get redirected to the Sign in page.		
T18	US06: As admin I can add new products to the website so that I can keep my shop up to date.	Admin users should have the capability to add new products directly on the website interface, without the need to access the Django admin window.	1.Go to homepage. Make sure admin user is signed in. 2.Navigate to the product management link (through the user icon dropdown). 3.Click on it.	Verify when clicking on the Product Management link, it directs the user to the Product Management page, where they can add products to the online shop, using the form provided. Verify after submitting the new product, it is instantly visible on the products list. Verify the page has the same feel and look as the other pages on the website.	PASS	F33
T19	US07: As admin I can edit product information so that all products have the most relevant and useful information.	Admin users should have the capability to update product details, and the changes made by admin users should be reflected in the product details viewable on the site instantly.	1.Go to homepage. Make sure admin user is signed in. 2.Navigate to any products list 3.Click on the 'Edit' link of any product 4.Click on the image of any product to navigate to the Product Detail page 5.Click on the 'Edit' link 6.Go to the Admin page	Verify when clicking on the 'Edit' links the admin user gets redirected to the Product Management page. Verify the form is pre-populated with the product-relevant information that the admin can overwrite, then save. Verify in the Django admin window, the admin can get the list of products by clicking on the Products link on the side menu. Then each product can be expanded by clicking on their 'sku' number. Verify that when the admin overwrites the necessary details and saved, the changes are instantly visible	PASS	F32, F33

				in the products lists and the product detail pages.		
T20	US07: As admin I can edit product information so that all products have the most relevant and useful information.	Non-admin users should not have the ability to edit product details. This functionality should be restricted to admin users only.	<ol style="list-style-type: none"> 1.Go to homepage. Make sure admin user is not signed in. 2.Click on the user icon 3.Navigate to any products list 4.Click on the image of any product to navigate to the Product Detail page 	<p>See T17</p> <p>Verify that if a logged-in general user or an anonymous user navigates to any Products list or Product Detail page, the 'Edit' link, or the Admin link in the navbar is not visible for them.</p>	PASS	F01, F29, F32, F33
